Accessibility Plan

Computing Curriculum and Delivery

We aim to deliver a high-quality computing education that equips pupils to use computational thinking and creativity to understand and change the world. Our goal is to ensure pupils are able to use, and express themselves and develop their ideas through, information and communication technology.

Aims:

- follow the National Curriculum and associated guidelines for computing.
- enable all children to enjoy using information technology purposefully by delivering an education that equips learners to become active participants in a digital world
- encourage children to use and apply information technology independently and safely (See E-Safety Policy) .
- build on and develop existing knowledge through skills taught in each year group to maintain continuity and progression .
- ensure all pupils are responsible, competent, confident and creative users of information and communication technology

Planning:

All teachers follow the South Glos scheme of work and supplement this with additional resources using their professional judgement.

Assessment:

Every pupil is assessed at the end of each year against the National Curriculum objectives.

Access to ICT & Equal Opportunities

We value equal opportunities for all of our children and believe that all ICT resources should be fully accessible to all learners, including those with special educational needs and disabilities.

We aim to provide a growing range of ICT equipment to all pupils, meeting a diverse range of individual needs. This is regularly monitored regardless of age & ability.

This policy will be reviewed at least every three years.
