

Computing Curriculum and Delivery

We aim to deliver a high-quality computing education that gives our children the confidence to explore and equip them with the skills needed in our ever changing technical world. We aim to facilitate this in an interesting, cross curricular and safe environment.

Aims:

- To follow the National Curriculum and South Gloucestershire guidelines for computing.
- To enable all children to enjoy computing purposefully by delivering an education that equips learners to become active participants in a digital world.
- To encourage children to use and apply computing independently and safely (See E-Safety Policy).
- To build on and develop existing knowledge through skills taught in each year group to maintain continuity and progression.
- To ensure all pupils are responsible, competent, confident and creative users of computing equipment.
- To use computing to enhance other areas of the curriculum.

Planning:

All teachers follow the South Gloucestershire scheme of work, the schools Progression and Skills map supplement this with additional resources using their professional judgement.

Assessment:

Every pupil is assessed at the end of each year against the National Curriculum objectives.

Access to ICT & Equal Opportunities

We value equal opportunities for all of our children and believe that all computing resources should be fully accessible to all learners, including those with special educational needs and disabilities.

We aim to provide a growing range of computing equipment to all pupils, meeting a diverse range of individual needs. This is regularly monitored regardless of age & ability.

This policy will be reviewed at least every three years.
